

The whole tree, in one page

Every branch of the framework and every rule on it, one line each. Open a branch to see what sits under it, open a rule to read the provision it came from.

▼ The bank balance sheet under Basel III	673
▼ Assets and exposures	342
▼ Credit risk – standardised approach	126
▼ Sovereign exposures	6
• Risk weights for sovereign and central bank exposures 0% risk weight (AAA to AA-) · 20% risk weight	CRE20.7
• National discretion for lower risk weight on domestic-currency sovereign exposure	CRE20.8
• 0% risk weight for named international organisations 0% risk weight	CRE20.10
• Risk weights for non-central government public sector entities 20% risk weight · 50% risk weight	CRE20.11
• 0% risk weight for eligible multilateral development banks 0% risk weight · majority of external ratings	CRE20.14
• Risk weights for non-eligible MDB exposures, including the no-ratings 50% weight 50% risk weight (no external ratings permitted)	CRE20.15
▼ Public sector entities	5
• Non-operational non-financial corporate, sovereign, MDB and PSE funding runs off at 40% 40% run-off factor	LCR40.40
• Fully insured non-financial corporate and public sector funding runs off at 20% 20% run-off factor	LCR40.41
• Definition of a bank exposure	CRE20.16
• ECRA base and short-term risk weights for bank exposures 20% base risk weight · 30% base risk weight	CRE20.18
• Maturity windows qualifying for short-term bank risk weights original maturity of three months or less · ...	CRE20.19
▼ Multilateral development banks	3
• Due diligence can only ratchet risk weights up, never down at least one bucket higher	CRE20.20
• SCRA Grade A/B/C risk weights for bank exposures 40% base risk weight (Grade A) · 75% base risk weight	CRE20.21
• 30% SCRA weight for very strongly capitalised unrated banks 30% risk weight · CET1 ratio meets or exceeds 100%	CRE20.21
▼ Bank exposures	2
• Mandatory Grade C classification triggers previous 12 months	CRE20.29
• Sovereign risk weight floor on foreign-currency bank exposures	CRE20.32
▼ Covered bonds	9
• Definition of a covered bond	LEX30.37
• Qualifying covered bonds may be valued at 20% of nominal; others at 100% 20% of nominal value (floor) · 100% of nominal value	LEX30.38
• Covered bond cover pool eligibility: RW and LTV thresholds 35% risk weight (residential) · 80% LTV (residential)	LEX30.39
• Covered bond pool must be overcollateralised by at least 10% 10% overcollateralisation	LEX30.39
• Covered bond conditions must hold at inception and throughout maturity	LEX30.40
• Eligible cover pool composition limits for covered bonds loan-to-value ratio of 80% or lower · loan-to-value ratio	CRE20.34
• 10% minimum overcollateralisation of covered bond cover pools at least 10% overcollateralisation	CRE20.35
• Covered bond investor information: 90-day arrears, at least semi-annually more than 90 days past due · at least semi-annually	CRE20.37
• Risk weights for rated and unrated covered bonds 10% risk weight · 15% risk weight	CRE20.38
▼ Securities firms and other financial institutions	1
• Classification of securities firms and other financial institutions	CRE20.40
▼ Corporate exposures	10
▼ General corporate	5
• Definition of the corporate exposure class	CRE20.41
• Corporate base risk weights from external ratings, subject to due diligence	CRE20.42
• 100% risk weight for unrated corporates and the rated corporate table 100% risk weight (unrated) · 20% risk weight	CRE20.43
• Flat 100% corporate risk weight where external ratings are not permitted 100% risk weight	CRE20.44
• 65% risk weight for investment grade corporates in no-ratings jurisdictions 65% risk weight	CRE20.46
▼ Small and medium enterprises	3
• Definition of a corporate SME: consolidated annual sales up to EUR 50 million annual sales less than or equal to EUR 50 million	CRE20.47
• 85% risk weight for corporate SME exposures 85% risk weight	CRE20.47
• SMEs meeting regulatory retail criteria are weighted 75% 75% risk weight	CRE20.47
▼ Specialised lending	2
• Definition of specialised lending exposures	CRE20.48
• Risk weights for unrated specialised lending: 100%, 130% and 80% 100% risk weight (object and commodities financing)	CRE20.51
▼ Subordinated debt, equity and other capital instruments	5
• 400% and 250% risk weights for equity exposures 400% risk weight · 250% risk weight	CRE20.57
• 100% equity weight for subsidised legislated programmes, capped at 10% of total capital 100% risk weight · aggregate cap of 10% of total capital	CRE20.59
• 150% risk weight for subordinated debt and non-equity capital instruments 150% risk weight	CRE20.60
• Materiality thresholds for investments in commercial entities: 15% and 60% of capital 15% of the bank's capital (individual investments)	CRE20.61

			•1250% risk weight on commercial entity investments above the thresholds 1250% risk weight	CRE20.62
		▼ Retail exposures		12
